PROFILE SUMMARY

I am a highly competent IT professional with a proven track record in designing websites, software coding and managing databases. I have strong technical skills as well as excellent interpersonal skills. My multicultural background enables me to have excellent communication skills and be able to work in teams as well as work individually on tasks. I'm a quick learner of new technologies, platforms and processes plus goal Oriented and able to work under pressure. Passionate about web technologies and software architecture and design

SKILLS & TOOLS

- Languages: Java, Javascript, React, jQuery,HTML5, CSS, Ruby,Rails, , NodeJs
- Databases: Postgres, MySQL, ODBC
- CMS: Joomla
- Version Control and Collaborative tools: TortoiseSVN, GitHub
- Software Development Methodologies: Agile, Pair programming, Scrum
- Concepts: OOP, Use cases, UML
- Design Patterns, MVC
- Project handling tools: Jira, Mercurial

PROFESSIONAL EXPERIENCE

Studied Software Engineering Immersive at General Assembly 2020

Learned and applied Front-end skills like HTML/CSS, JavaScript, jQuery, React and back-end skills like Ruby on Rails, Node.js in different projects.

Field Engineer, Pivotal Business Systems, May 2013-2017

- Responsible for the installation and maintenance of IT equipment including (but not restricted to) printers, scanners, X-terms and workstations.
- Supporting customers using remote access technologies and also visiting client sites.
- Working closely with software suppliers(Samford, Ricoh Australia) to resolve operational issues.

Software Developer – TeliaSonera (Through Sigma AB) – Gothenburg – Sweden January – Jun 2011

Features/Scope:
- The entire web application (http://www.telia.se/privat) needed a new graphical user interface, the projects were very intensive and must be completed on time. Very challenging project because of Telia uses old and new technology in its web application.

Responsibilities:
- Develop a new graphical user interface for www.telia.se
- Coding the Business section of the website

Achievements
- Successfully deliver the project under budget and prior to the deadline.
- Successful implementation of tasks that should be solved by me.
- Worked extensively with senior developer on the project.
- Developed strong relationships with key figures across the organisation.
- Achieved good experience in Scrum and Agile Software Development.

Bachelor of Science in Information Systems, IT University of Gothenburg, Sweden 2011

PROJECT HISTORY

TickTakToe Game in JavaScript 2019

Technologies Used: HTML, CSS, JavaScript, jQuery

Built a website with Ruby on Rails 2019

The aim of this project:
- Implemented at least 3 models, with associations
- Is a CRUD system in Rails
- Handles invalid data
- Uses Gems
- Has basic authentication and authorisation
- Is deployed to [Heroku](https://www.heroku.com/)

Front and back-end web development with React and Rails2019

The aim of this project:
- Implemented at least 3 models, with associations
- Use partials to DRY (Don't Repeat Yourself) up your views.
- Handles invalid data.
- Forms should validate data and handle incorrect inputs.
- Validate sign up information, verify valid email addresses and secure passwords.
- Use Gems
- User Login. Basic authentication and authorisation set up.
- Is deployed to [Heroku](https://www.heroku.com/)
